

## *“Calcite & Quartz: A Hands-On Demonstrational Lecture*

### **Bill Desmarais**

Science teacher (retired)  
Washington High School, Cedar Rapids  
and CVRMS member

Students, learn about minerals and two of the most common and important minerals found in Iowa, calcite and quartz. You will then test the minerals yourself for their significant properties. Demonstrations will also be done of other calcite and quartz properties. Each student will receive a sample of calcite and quartz to jump start your mineral collection.
